Sulphur/ Nitratefilter

H&S

H&S Sulphur Filter

The best results can be reached
when the Sulphur Filter is filled up with:
2/3 Sulphur

1/3 Coral Gravel up to 10 mm

Adjustment of the Sulphur Filter:

1 drop per second

**4 days after starting the Sulphur Filter the value
of nitrate has to be measured.**

**Is the value 0, the drops coming out of the Sulphur
Filter have to be raised up until the value of nitrate
has a minimum of 1.**

**Now the drops have to be reduced again until the
value 0.**

**The Sulphur Filter is working best, when the value
of nitrate lasts at 0.**
